Lists of metalloids - Wikipedia

Recognition status, as metalloids, of some elements in the p-block of the periodic

table. Percentages are median appearance frequencies in the lists of metalloids. The staircase-shaped line is a typical example of the arbitrary metal–nonmetal

dividing line found on some periodic tables.

flying color ...

Amalgam
(chemistry) -
Wikipedia

Important amalgams
Zinc amalgam. Zinc
amalgam finds use in

organic synthesis (e.g., for the Clemmensen reduction). It is the reducing agent in the Jones reductor, used in analytical chemistry. Formerly the zinc plates of dry

batteries were amalgamated with a small amount of mercury to prevent deterioration in storage. It is a binary solution (liquid-solid)

of mercury and zinc.
