PHP - Wikipedia

PHP is a general-purpose scripting language geared towards web development. It was originally created by Danish-Canadian programmer Rasmus Lerdorf in 1994. The PHP reference implementation is now produced by

The PHP Group. PHP originally stood for Personal Home Page, but it now stands for the recursive initialism PHP: Hypertext Preprocessor.. PHP code is ...

Web Database Applications with PHP and MySQL, 2nd Edition

This book shows you how to develop web database applications that are built around the three-tier

architecture model shown in Figure 1-3. At the base of an application is the database tier, consisting of the database management system that manages the data users create, delete, modify, and query. Built on top of the database tier is the middle tier, which contains most of ...
