Abiogenesis - Wikipedia

In biology, abiogenesis, or informally the origin of life (OoL), is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but an evolutionary process of increasing complexity ...

Hydrogen - Wikipedia

Hydrogen is the chemical element with the symbol H and atomic number 1. Hydrogen is the lightest element. At standard conditions hydrogen is a gas of diatomic molecules having the formula H_2 . It is colorless, odorless, non-toxic, and highly combustible. Hydrogen is the most abundant chemical substance in the universe, constituting roughly

75% of all normal matter.

Removing the bottleneck in whole genome sequencing of ...

1/3/2017 · 1. Introduction. The
publication of the first

Mycobacterium tuberculosis genome sequence in 1998 heralded a new era in tuberculosis (TB) research. 1 The bacterium was found to have a relatively small circular genome of approximately 4.5 million base pairs and was estimated to have around 4000 potential genes. Sequencing of the M. tuberculosis H37Rv reference strain was soon followed by other ...

Tools and systems for assessing soil health | VRO ...

Soil chemistry is complex and is affected by soil biology and soil

physical characteristics to various degrees depending on the soil test. An understanding of these is needed to use soil tests. The simplest stage is obtaining a soil sample, but training is needed and care must be taken not to contaminate the sample and to collect a representative soil sample.
