Progress - Wikipedia

Progress is the movement towards a refined, improved, or otherwise desired state. In the context of

progressivism, it refers to the proposition that advancements in technology, science, and social

organization have resulted, and by extension will continue to result, in an improved human condition; the

latter may happen as a result of direct human action, as in social enterprise

or ...

ESPAS - Global Trends to 2030

It is worth noting that while European poverty differs from

poverty elsewhere in that we are wealthier than most of the rest of the world, 23.4% of our population is

still at risk of poverty, living of 60%
or less of the national median income.

9/11/2010 · This water supply target

underpins several other MDGs,
including those relating to poverty
(MDG1), education (MDG2), and

gender equality (MDG3). In particular, it underpins MDG4, the reduction of child mortality, because

many deaths in young children in developing countries are due to diarrhoeal disease, and unsafe water

is a key risk factor for diarrhoeal
disease in this ...

22/5/2015 · Violence is an endemic and virulent current aspect of global

society, one that simultaneously constitutes and is constituted by inequality; it is a trait of modern

cultural-political society that
oppresses, damages, and is, arguable,
wholly ethically pernicious to the

global tradition and agenda of
progress towards a 'more utopian'

version of reality.
